

## **Homeownership Finance Fund Set-Aside (HOFF): Expanding Affordable Homeownership through the CDFI Program**

FINAL DISCUSSION DRAFT

### Summary

**The time is right for the Biden Administration to work with Congress to establish a Homeownership Finance Fund (HOFF) set-aside within the CDFI Financial Assistance (FA) Program.** Our country faces a severe and worsening housing affordability and supply crisis, as well as persistent and harmful racial disparities in the rates of homeownership and household wealth. CDFIs and nonprofit housing developers can help solve these problems by scaling up the production of homes affordable to low- and moderate income (LMI) families –including many households of color and first time homebuyers- who are increasingly priced out in many markets across the country. To do so, we seek increased access to patient and flexible capital in order to expand nonprofit delivery systems for affordable homeownership. HOFF will serve as a counterbalance to the nation’s multi-year underproduction of homeownership units and help to generate the volume of homes (both through rehabilitation and new construction) that LMI households urgently need, at price points they can afford, in communities of opportunity.

### Background

Across the nation, CDFIs and nonprofit housing developers have a strong track record of producing quality homes that enable LMI families to attain affordable homeownership and the benefits that typically accrue to owning a home over time (e.g., predictable housing costs, asset appreciation, generational wealth building, and neighborhood stability).

The success of the CDFI Fund model is demonstrated by cumulative investments and outputs over time, including development or rehabilitation of over 2.1 million housing units.<sup>1</sup> It is also reflected in sustained, bipartisan Congressional support in the form of annual appropriations that have steadily increased to a current high of \$295 million for FY 2022. Further, the Biden-Harris Administration requested \$336 million (12% increase) for CDFI Fund programs for FY 2023<sup>2</sup> while national CDFI advocates are asking Congress to provide up to a \$1 billion for these proven programs.<sup>3</sup>

In the face of the nation's acute housing supply crisis, as well as chronic and well documented racial disparities in the rates of homeownership and household wealth building<sup>4 5</sup>, CDFIs and their experienced nonprofit developer partners seek to scale their production of affordably-priced homes for purchase by LMI families who are crowded out in many markets across the country –including increasingly by corporate investors and all-cash buyers. We seek to produce the volume of homes that hardworking families across the country need, at price points these households can afford, in areas of high opportunity. We seek to leverage nonprofit-led delivery systems as a counterweight to the nation's acute underproduction of housing and to harsh supply and demand constraints that disproportionately impact LMI households, first time homebuyers, and families of color.<sup>6 7 8</sup> To achieve these goals, CDFIs and nonprofit developers need increased access to dedicated, highly flexible and patient capital.

#### Proposal for Consideration by Treasury

**NCST and the Homeownership Alliance<sup>9</sup>, a practitioner-led coalition of 31 CDFIs and nonprofit housing developers from 19 states, ask the Treasury Department to establish a Homeownership Finance Fund (HOFF) within the CDFI Fund's Financial Assistance (FA) program.** This set-aside would provide a dedicated pool of flexible, competitively-awarded funds in each funding cycle to advance affordable homeownership production activities consistent with existing program objectives.<sup>10</sup>

The case for creating a homeownership-focused set-aside within the CDFI Fund is strong. **First**, the concept aligns with the Biden-Harris Administration's commitment to advancing racial equity and to supporting underserved communities.<sup>11</sup> It is also consistent with the Administration's *Housing Supply Action Plan*<sup>12</sup>, its strategy for fighting inflation<sup>13</sup>, and its whole-of-government approach to addressing the national housing crisis. **Second**, the CDFI Fund Administrator has the authority and flexibility within the existing statutory framework to direct program resources to national priorities.<sup>14</sup> **Third**, there is precedent. Three set-asides (FA supplemental pools) currently exist to incentivize investments that address specific national priorities: Healthy Food Financing Initiative (HFFI-FA) launched in FY 2011; Disability Funds (DF-FA) established in FY 2018, and Persistent Poverty Counties (PPC-FA).<sup>15 16</sup> **Fourth**, while more than half of all CDFIs report Residential Real Estate Finance as a top primary or secondary line of business<sup>17</sup>, it appears that CDFI housing investments over time have skewed to rental production. For example, cumulative reporting by CDFI Program Award Recipients between FY 2010 to FY 2021 shows that only 8.5% of *Affordable Housing Units Financed* during this period were homeowner units. The corresponding figure for FY 2021 alone is 11.9%.<sup>18</sup> **Fifth**, with FY 2022 appropriations for the CDFI Fund at their highest level since inception, and with a 12% increase proposed by the Biden-Harris Administration for FY 2023, establishing a specific set-aside to spur homeownership production would not reduce resources for other CDFI Fund programs and priorities. **Finally**, time is of the essence. As interest rates and home prices continue to rise, as competition from corporate and cash investors continue to crowd out many LMI

buyers, and as the Administration approaches the mid-point of its term, now is the time for bold actions that can be approved and implemented through administrative action, and with the support of Congressional appropriators.

#### Options for Homeownership Finance Fund Structure

**Option A: We recommend structuring the Homeownership Finance Fund (HOFF) as a set-aside within the Base FA program, similar to- but distinct from the three existing supplemental pools (HFFI-FA, PPC-FA and DA-FA).** Under this approach, Treasury would propose annual funding levels for the HOFF as well as for the Base FA program. Treasury would also have authority to allocate additional funds to the HOFF based on needs and circumstances.

While conforming to the statutory requirements of the FA program overall, we recommend that Treasury utilize its authority to design HOFF as a set-aside that provides increased / maximal flexibility for CDFIs to address the diverse homeownership and housing finance needs of LMI buyers in proven and innovative ways. For example, we urge that the HOFF specifically support homeownership projects for which valuation gaps must be addressed in the financing stack. Such properties are often located in distressed neighborhoods and do not score as competitively as projects requiring less subsidy.

More broadly, we ask that the HOFF emphasize sustainable LMI homeownership outcomes, rather than the amount of patient capital that each transaction may require. We also note that demand for Base FA awards has exceeded supply in recent funding cycles by as much as 3-to-1.<sup>19</sup> In this context, having to win a Base FA award in order to be eligible for HOFF set-aside funds would likely result in loss of consideration for many viable homeownership projects that are prioritized in their local or regional markets. This precondition currently applies to HFFI-FA, PPC-FA and DA-FA awards; it should not be extended to the HOFF.

We also encourage Treasury to draw on the Capital Magnet Fund (CMF) framework for further shaping eligible activities, uses and priorities of HOFF.<sup>20</sup> However, we do not recommend incorporating other aspects of the CMF into the HOFF. For example, the CMF statute imposes a minimum 10:1 leverage requirement.<sup>21</sup> This threshold is too high in that it impedes many otherwise feasible projects. Similarly, we urge Treasury to exclude the *home purchase price limits* that currently apply under CMF from the HOFF. As detailed separately<sup>22</sup>, these price caps do not have a basis in the CMF statute and make it increasingly difficult to deploy CMF funds to help LMI homebuyers in many markets today.

**Option B: If Treasury determines that establishing a homeownership set-aside is not feasible, we would encourage the following adjustments to the FA program in order to make homeownership-focused applications more competitive for Base FA awards:**

- Eligibility Review / FA Objectives - Ensure that FA applications focused on continuing to serve *existing* target populations and *existing* investment areas with *existing* products

and services are not disadvantaged relative to those focused on *new* target populations, *new* geographic areas, or *new* products and services;<sup>23</sup>

- Business Plan Review – The CDFI Fund evaluates and scores the soundness of an applicant’s comprehensive business plan. Points are awarded in five categories, including up to 12 points for *Products and Services*.<sup>24</sup> Consider making homeownership-focused applications eligible for extra points in this category; and
- Policy Objective Review – Base FA applications are currently evaluated on their ability to meet three policy objectives set by the Fund: addressing economic distress and need; expanding economic opportunities; and increasing resources through collaborations and partnerships. Consider adding as a fourth policy objective: *reducing racial disparities in homeownership and household wealth building*.

### Conclusion

We live in extraordinary times. The underproduction of homeownership units over the past decade, combined with the rapid escalation of home prices, rising interest rates, and increased competition by corporate- and cash investors mean that fewer and fewer LMI families –especially Black and Brown households- are able to attain homeownership today.

Recognizing that the housing affordability and supply crisis will require a sustained response over time, additional resources are clearly needed and warranted. Creating a set-aside for affordable homeownership within the CDFI Fund’s Financial Assistance program would be a powerful way to respond to the crisis and begin to reduce racial disparities in terms of who gets to own a home and build household wealth overtime. We would welcome the opportunity to meet with your office to discuss this proposal further. <sup>1</sup> The cumulative impacts of CDFI investments include the development or rehabilitation of over 2.1 million housing units. [Opportunity Finance Institutions Side By Side: Fiscal Year 2020 OFN Member Data Analysis, Twenty Third Edition](#).

<sup>2</sup> Page 97 of FY23 OMB Budget Request.

<sup>3</sup> [CDFI Coalition, Current Policy and Advocacy webpage](#); FY 2023 Appropriations.

<sup>4</sup> [FACT SHEET: Biden-Harris Administration Announces New Actions to Build Black Wealth and Narrow the Racial Wealth Gap](#); Biden-Harris Administration Announces New Actions to Build Black Wealth and Narrow the Racial Wealth Gap; the White House, Statements and Releases; June 1, 2021. “...The U.S. is home to stark and persistent disparities in homeownership and wealth. Across the country, just 49 percent of Hispanic Americans and 45 percent of Black Americans own their own homes, compared to 74 percent of White Americans. Hispanic and Black households also have just a fraction of the wealth of their White counterparts....”

---

<sup>5</sup> According to the [Federal Reserve's 2019 Survey of Consumer Finances](#) (Sept. 2020), the median wealth of White households is eight times higher (\$188,200) than that of Black households (\$24,100) and five times higher than that of Hispanic households (\$36,200). This survey is conducted every three years. The 2022 survey is being conducted between March and Dec. 2022. According to the [Urban Institute](#), 72.2% of White households own their home, compared to 42.3% of Black households and 48.1% of Hispanic households. The accrued impact of these disparities over many decades and generations of families is also reflected in the [distressed] physical and financial conditions of many communities of color.

<sup>6</sup> According to the [National Association of Home Builders](#), the price of residential construction materials rose 33% since the start of the pandemic through March 2022. This total includes a 20.4% year over year increase during 2021, and 7.7% increase in Q1 of 2022. The price of services inputs for residential construction increased even further, by 39%. (NAHB's report draws on the U.S. Bureau of Labor Statistics' [April 2022 Producer Price Index \(PPI\) report](#).)

<sup>7</sup> Post-pandemic economic conditions that have made home ownership significantly more difficult for families of all colors to achieve and sustain include rising interest rates; historic low for-sale inventory; heightened competition in the single family purchase (SFP) market, including from corporate investors with the capital resources to make all-cash offers; [increasing U.S. house prices](#), which rose 18.7% from Q1 2021 to Q1 2022, and 4.6% from Q4 2021 (FHFA Housing Price Index); home builder supply chain disruptions; and a continuing multi-year trend of underproduction.

  - 29,902 (\$14.3 billion) Residential Real Estate Originations
  - 371,631 Affordable Housing Units financed (340,089 Rental units and 31,542 Owner units)
- Annual Performance Report of CDFI Program Award Recipients for FY 2021 includes:
  - 77,824 (\$10.7 billion) in Home Improvement and Home Purchase Originations
  - 6,549 (\$3.2 billion) Residential Real Estate Originations
  - 49,776 Affordable Housing Units financed (43,850 Rental units and 5,916 Owner units)

<sup>19</sup> [CDFI Program Award Book, FY 2021](#).

KEY STATISTICS OF FY 2021 BASE FA APPLICANTS. For the fiscal year (FY) 2021 funding round of the CDFI Program, the CDFI Fund received applications from 420 organizations requesting \$366.1 million in Financial Assistance (Base-FA) awards. Of those applicants, 316 Core applicants requested \$304.7 million in awards, and 104 Small and/or Emerging CDFI (SECA) applicants requested \$61.4 million in awards.

KEY STATISTICS OF FY 2021 BASE FA AWARDEES. 248 Base FA awards made, totaling \$119.2 million. 180 were Core awards totaling \$99.4 million, and 68 were SECA awards, totaling \$19.9 million.

<sup>20</sup> [12 CFR Part 1807.402](#) Affordable Housing - Homeownership

<sup>21</sup> [12 CFR Part 1807.500](#) Leveraged Costs; Eligible Project Costs.

- (a) Each CMF Award must result in Eligible Project Costs in an amount that equals at least 10 times the amount of the CMF Award or some higher standard established by the CDFI Fund in the Recipient's Assistance Agreement. Such Eligible Project Costs must be for Affordable Housing Activities and Economic Development Activities, as set forth in the Assistance Agreement.

<sup>22</sup> Capital Magnet Fund regulations prevent CMF funds from being used to purchase homes priced above 95% of the area median home price as determined by HUD for the HOME program. These price limits do not have a basis in the CMF statute. Rather, CMF regulations adopted these limits from HUD rules by reference at [1807.402 \(a\)\(2\)](#). Under [1807.105](#), CMF has authority to waive these limits for current CMF grantees.

As detailed below, the HOME price limits are artificially low relative to market. Given the continued rise in home prices, rising interest rates and overall housing market volatility, we urge Treasury to not port the HOME price limit requirement from CMF to the HOFF set-aside.

The Homeownership Alliance recently asked Treasury to provide an immediate 12-month waiver to the provision. In the longer term, the Homeownership Alliance also urged the CDFI Fund to amend the CMF regulations to delete the counterproductive and unnecessary HOME price limit requirement. The requests reflect difficulties that Alliance members in markets across the country having to deploy CMF funds on behalf of qualified borrowers because the homebuyers cannot find homes priced below the applicable HUD HOME value limits.

For many years, the HUD HOME value limits have unnecessarily limited housing choice for recipients of down payment assistance. Recently, surging home prices and supply-demand market imbalance have transformed this long-standing impediment to fair housing into an insurmountable obstacle. [FHFA's House Price Index](#) rose 18.3% from May 2021 to May 2022.

Prices have escalated so much that, despite a surplus of qualified buyers below 80% AMI, there simply aren't enough homes priced below the limit to meet the demand. For example, in Gwinnett County GA, one of metropolitan Atlanta's largest counties, less than two percent (120) of the 6,953 homes listed, under contract, or sold between March and June 2022 were priced below the \$281,000 HOME price limit. Similarly, fewer than nine percent of homes sold in Albuquerque during the same period were priced below the then-applicable \$200,000 HOME value limit.

<sup>23</sup> This requirement is statutory. Public Law 103-325. Riegle Community Development and Regulatory Improvement Act of 1994, Title I, Subtitle A, [Section 105\(b\)\(4\)\(B\)](#) ("Minimum Requirements") requires an applicant that has previously received CDFI assistance to demonstrate that it "will expand its operations into a new investment area or serve a new targeted population, offer more products or services, or increase the volume of its business;"

<sup>24</sup> [FY2022 CDFI NOFA](#)
